

Master di II livello in *Geotecnica per le Infrastrutture*

In Cooperation with INFRARAIL, TECNE, ITALFERR, BBT SE

Deficiencies in infrastructure are responsible of delay in development. All countries that aim to strengthen their economies have an ongoing program of improvement and maintenance as well as strengthening the system of important infrastructures. The labour market in the field of civil engineering will be strongly and positively conditioned by this national and international effort.

The GE - INFRA Masters course aims to train engineers in the civil area specialized in the field of geotechnical engineering, able to face the challenges of designing and building new resilient infrastructures but also to apply themselves to control and diagnostics to recover existing infrastructures.

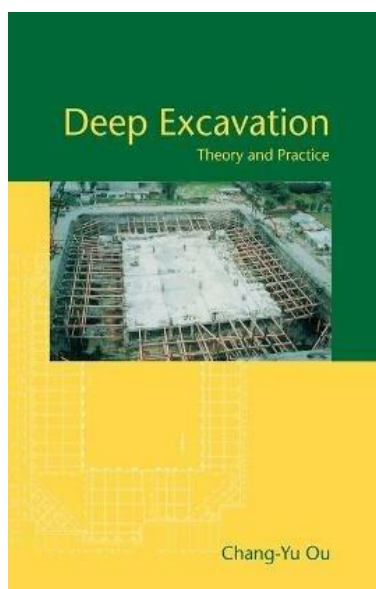

SEMINAR ON WEB - 12.07.2022

09:45 – 10:00 Introduction by the Chair of the Master: **prof. Gianpiero Russo**

10:00 – 11:30 **Control of ground movement in excavations.**

Prof. Chang-Yu Ou

Professor of construction engineering, National Taiwan University of Science and Technology

MASTER IN GE-INFRA
Chair of the Master: prof. Gianpiero Russo
E-mail: gianpiero.russo@unina.it
Didattic office: Mrs. Tiziana Bellardini
